SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§ 1.56, 1.97 and 1.98, Applicant hereby submits an Information Disclosure Statement for consideration by the Examiner.

I. LIST OF PATENTS, PUBLICATIONS, AND OTHER INFORMATION

The patents, publications and other information requested to be considered by the Office (except unpublished U.S. patent applications) are listed on Form 1449 attached hereto.

II. COPIES

A. ☐ Submitted herewith is a legible copy of (i) each U.S. patent application publication and U.S. and foreign patent; (ii) each publication or that portion which caused it to be listed; (iii) for each cited pending U.S. application, the application specification including the claims, and any drawing of the application which caused it to be listed including the claims directed to that portion; and (iv) all other information or that portion which caused it to be listed.

B. ☐ Any patents, publications or other information which are listed on Form 1449 or on the copies of PTO-892, but which are not enclosed herewith, were previously cited by or submitted to the PTO in one of the following applications which has been relied upon for an earlier filing date under 35 U.S.C. § 120:

U.S. Serial Number

U.S. Filing Date

C. ☒ Because the present application was/is being filed after June 30, 2003, no copies of the U.S. patents or U.S. patent application publications which are listed on the attached Form 1449 are enclosed pursuant to the waiver of 37 C.F.R. § 1.98(a)(2)(i). Any foreign patent documents or non-patent literature listed on the attached Form 1449 are enclosed herewith.

D. ☐ This is a PCT application in the entry of the National Phase in the United States. A copy of the International Search Report is attached for the Examiner's information. The documents listed on the International Search Report are listed on the attached Form 1449 for consideration by the Examiner and for listing on any patent resulting from this application. Since the International Search report was from the US, EPO, or JPO search authorities, copies of these references should have been supplied to the USPTO under the trilateral agreement and are believed to be in the file of the above-identified application. (MPEP 1893.03(g).)

III. CONCISE EXPLANATION OF THE RELEVANCE (check at least one box)

A. ☒ Except as may be indicated below in (B), all of the patents, publications or other information are in the English language (concise explanation not required).

B. ☒ A concise explanation of the relevance of each patent, publication or other information listed that is not in the English language is as follows (see 37 C.F.R. § 1.98(a)(3)):

1. ☐ See the attached foreign patent office communication from a counterpart foreign application:

2. ☐ English translations are provided:

3. ☒ Other:

DT 1 951 306 Appears to disclose a large vacuum cleaner having a filter cassette (5) comprising a main filter (13) inserted into a cylindrical housing (14), which is provided at its front end with a prefilter (16). Through the end plate (22) of the housing a slider element (18 in Figures 3 and 5) projects, which carries a plurality of projections (24) at one side and an actuator knob (23) at the other side. By manual displacement of the slider element (18) the projections (24) appear to engage with and move across the rear edges of the main filter (13).

DT 1 964 261 (abandoned) Appears to disclose a large vacuum cleaner with a main filter having a folded filter material, which can be displaced and vibrated for removing dust by means of a filter cleaning member (25). The filter cleaning member (25) comprises conically shaped projections (29) for generating impacts on the ends of the folds (31) of the main filter when the filter cleaning member (25) is displaced by a crank shaft (23) in transverse direction (apparently to the longitudinal axis of the vacuum cleaner). The crank shaft is coupled to a cable drum so that each time the cable is wound onto the cable drum or is unwound from the cable drum, the filter cleaning member (25) is activated.

DE 42 35 745 (Alfred Kärcher GmbH & Co., Germany) Appears to disclose a vacuum cleaner with a pleated filter (4) having a plurality of flexible filter layers and with a movable scraper element (7), which upon movement moves along the free edges of the pleats of the filter layers and slightly enters between these filter layers.

1 768 312 Appears to disclose a small handheld electrically powered cleaning apparatus with a brush and a vacuum cleaner system (dust filter 7, fan wheel 6, electric motor 5). To permit cleaning of the dust filter (7) a brush (13) is incorporated, which is manually displaceable from the outside by means of an actuator handle (12).

DE 298 14 547 Appears to disclose a cleaning device for the pleated filter in a vacuum cleaner, which cleaning device comprises a friction means, which can be reciprocated at an outer side of the pleated filter perpendicular to the folding lines over a stroke length and thereby engages the pleats to remove dust from the pleated filter by vibration.

EP 0 444 516 Appears to disclose a vacuum cleaner having a filter bag (24) being connected with its upper end to a ring member (34) of a bag shaker (32). The bag shaker (32) is connected to the handle assembly (26) through a pair of springs (36).

C. ☐ The following additional information is provided for the Examiner's consideration.

IV. CROSS REFERENCE TO RELATED APPLICATION(S)

A. ☒ The Examiner is advised that the following co-pending application(s) contain(s) subject matter that may be related to the present application. By bringing this(these) application(s) to the Examiner's attention, Applicant(s) does (do) not waive the confidentiality provisions of 35 U.S.C. § 122.
